

3       means for executing a command, as part of execution of an  
4   application program, to transfer a document between a processing device in  
5   the computer system and a peripheral device;  
6       means for transmitting document data between the processing device  
7   and the peripheral device in response to the command;  
8       means for generating index information associated with the  
9   document data; and  
10      means for archiving the document data with the index information in  
11   a memory in the computer system in response to the command to transfer  
12   the document between the processing device and the peripheral device  
13   transparently to execution of the application program.

*C*

1       71. (New)   The apparatus defined in Claim 70 further comprising:  
2       means for capturing a source filename of the document, and means for  
3   providing links between archived document data and the electronic originals.

---

REMARKS

Prior to examination of the above-referenced case on the merits, please enter the following amendments. Claims 1-34 are canceled. Claims 35-72 have been added.

Please charge any shortages and credit any overcharges to our Deposit  
Account No. 02-2666.

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN LLP
